

Automatic Diesel Burner Unit

Suitable for using with Bitutainers™ and Bulk Bitumen Storage Tanks

A Range of High Output Efficiently Packaged Oil Fired Burner Systems, Pre-Tested and Ready to Use.

Features include:

- Suitable for both bitumens and bitumen emulsions.
- The basic system includes twin burners, that can be operated as single or dual units.
- Handles on burner heads for easy mounting.
- Fuel system has flexible protected hoses with standpipe. Hoses deliver via filter units built onto each burner head.
- Special 'slotted' adaptor plates make it quick and easy to fix and remove burner heads.

With Optional Control Panel

- Freestanding weather protected panel. Short trailing power supply lead. Plug in wiring connections between panel and burner heads.
- Thermostat temperature selection and control.
- Adjustable running/non running timer to give full control for heat up procedures from ambient through to working temperature.
